CESNET DEVELOPMENTS IN OPTICAL NETWORKING

CZECHLIGHT FAMILY & MORE

Michal Krsek
CESNET

1st GRP, 2019
La Jolla

■ NREN

- Network for local researchers and universities
- Link to international activities (GEANT, GLIF)

■ Services and Applications

- UltraGRID, Grids and Clouds, Storage

■ Optical research

- CzechLight family devices
- Remote sensing

cesnet

CZECHLIGHT FAMILY

■ Started in 2004

■ Principles

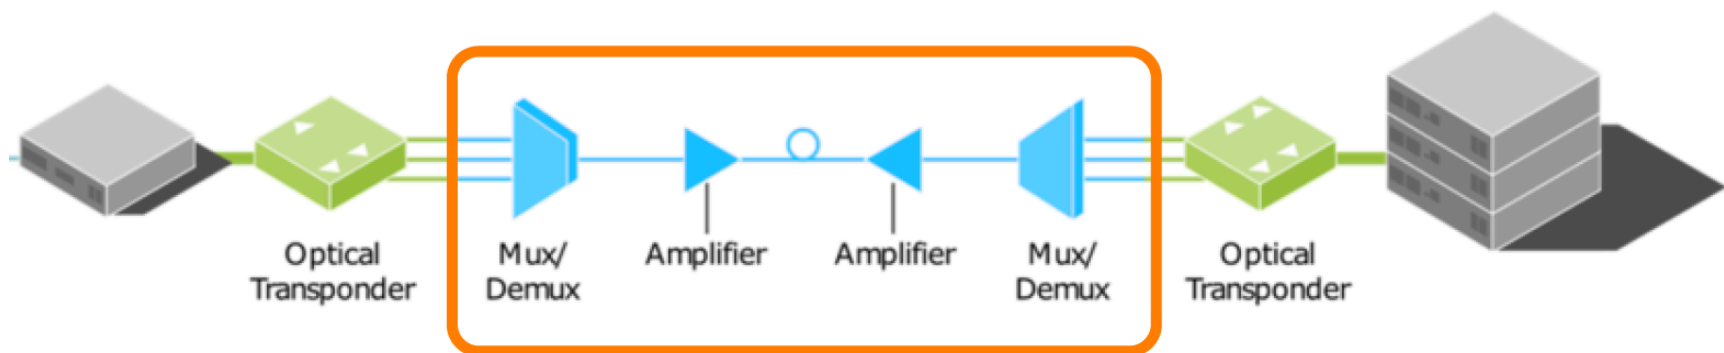

- Research and development until prototype
- Then license design to third party subjects
- Use of them in our infrastructure

■ Device types

- EDFA amplifiers, photonic switches, V-MUXes, fixed-grid legacy ROADMs, WSSes

■ SDN ROADMs

- Dynamic "optical cross connect"
- SDN managed
- 1U "pizza boxes"
- Up to 8-degree ROADM

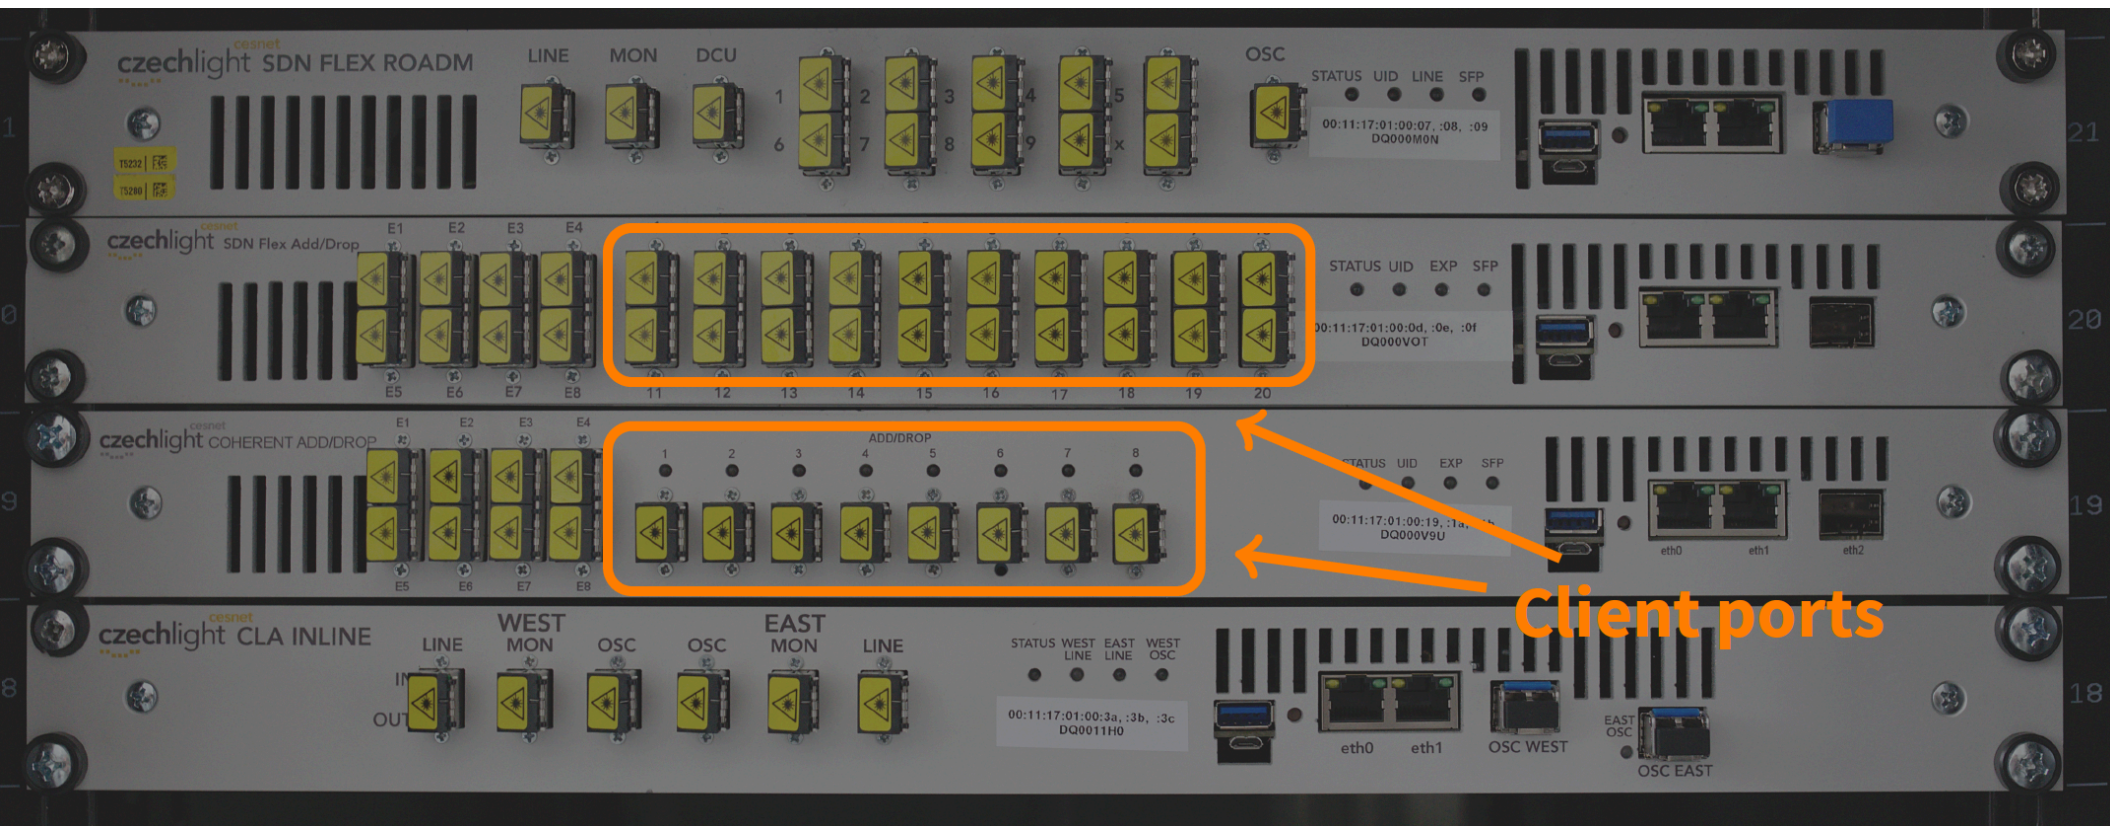

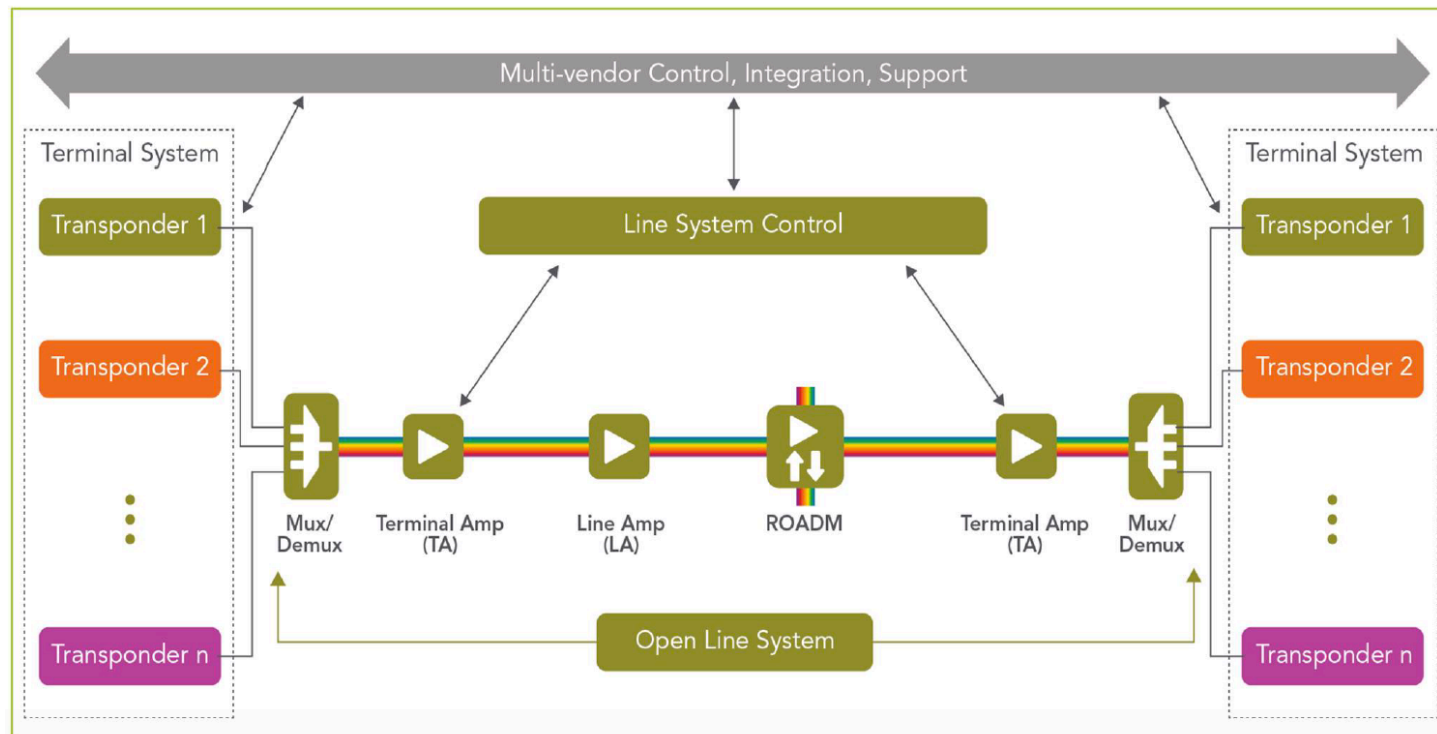

■ SDN Operation & Management

- Everything is remotely configurable
- Native Alien Wavelengths
- Telemetry, performance monitoring

■ Configuration

- NETCONF control
- YANG data model

- Able to adapt to one of current models

(OpenROADM, OpenConfig, TIP OpenDevice, T-API, IETF TE-topology, IETF CCAMP impairment-aware)

- Interactive CLI
 - SSH
 - microUSB port

■ Prototypes are ready to play with

- On loan from CESNET
- Partners from around the Globe are welcome

■ Integration with management platforms

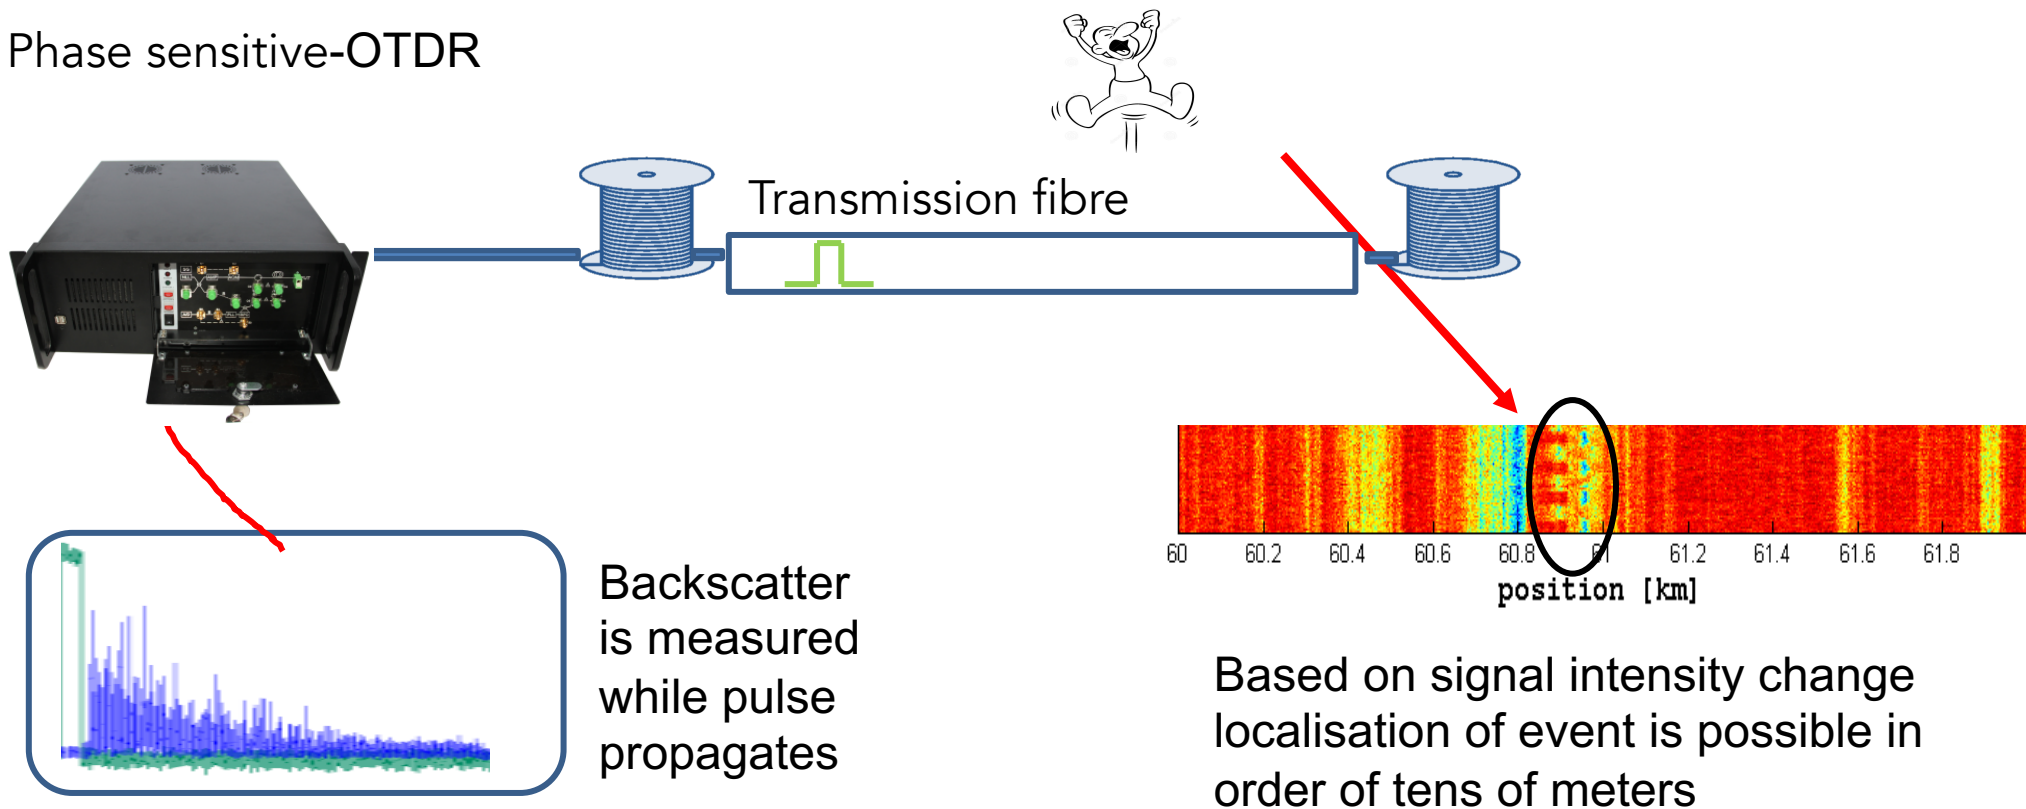

- ODTN
- T-API control
- TIP OOPT GNP_y
